EDUCATION

Iowa State University – Ames, IA

May 2026

Bachelor of Science in Computer Science, Cum Laude | GPA: 3.52 | Dean's List: 6/8 semesters

Relevant Coursework: Algorithms, Data Structures, Machine Learning, Operating Systems, Database Management, Cloud Computing, Software Testing, User Interfaces

External Coursework: Stanford Machine Learning Specialization; Agentic AI, DeepLearning.AI

TECHNICAL SKILLS

- **Languages:** Python, Java, C/C++, SQL, OCaml, R
- **Frameworks/Libraries:** React, FastAPI, Spring Boot, OpenCV, TensorFlow, PyTorch, Pandas
- **Tools:** AWS, Docker, Linux, Git/GitHub/GitLab, MySQL, Postman, Jupyter, Claude, AI Agents, LLMs

PROJECTS

Autonomous Chess-Playing Robot | Python, OpenCV, ROS, Stockfish, UR10e

January–May 2026

Senior Design Group Project at Iowa State University – CS 402

- Built autonomous chess system combining computer vision, Stockfish move generation, and UR10e robotic arm control
- Developed board-recognition and turn-state logic to detect moves, validate legality, and maintain game state
- Integrated OpenCV, ROS, and engine output into executable robot commands for human-versus-robot gameplay

NCAA Tournament Prediction Platform | Python, FastAPI, React, Gradient Boosting

February–April 2026

- Built a gradient-boosting NCAA tournament prediction model with 71.4% historical accuracy across 23 seasons using leave-year-out cross-validation.
- Engineered 50+ pre-tournament features and deployed a FastAPI + React app with team similarity search, bracket simulations, and feature importance analysis.

Multiplayer Game Simulation App | Java, REST APIs, WebSockets, MySQL

September 2024–December 2024

- Developed an Android app in Java with real-time multiplayer gameplay, virtual currency, and social communication using WebSockets and REST on a 4-person team. Version controlled through Gitlab and tested/deployed with CI/CD pipelines.
- Implemented 2FA-backed authentication and integrated MySQL-backed JSON REST APIs for user accounts and multiplayer.

JOB EXPERIENCE

ICS Advanced Technologies

May 2025–September 2025

Help Desk Support

Ames, IA

- Provided technical support to over 600 clients by applying layer 1-3 root cause analysis.
- Translated customer needs in real time to troubleshoot hardware. Achieved a 99% customer satisfaction score.
- Used ticketing system and Slack to communicate with tiered teams.

Best Buy

May 2024–August 2024

Sales Representative & Inventory Specialist

Bloomington, IN

- Advised customers on PC, TV, and home tech purchases by translating technical product details to clear recommendations
- Managed inventory workflows and supported sales operations in high-volume technology retail environment

LEADERSHIP & INVOLVEMENT

- **Pi Kappa Phi Fraternity** | Big Brother & Recruitment Team Advisor
- **AI & Machine Learning Club** | AI Agent Workflow Projects

Spring 2023–May 2026

Fall 2025–May 2026
